MY WALDEN GREEN STORY

"I am an 8th grader and I have attended Walden Green for 4 years. My parents chose Walden Green Montessori because it was more hands on and some of their friends' kids went there and it was highly recommended by them. They thought it looked cool because you can work more individually, yet also have times of group work. Walden Green is special to me because the teachers make the work more interesting than at other schools. I can learn from my mistakes rather than someone telling me what to always do. I love that Walden Green has a peaceful working environment with two teachers in every classroom and multiple ages in each class. Montessori Education is unique because it has a very respectful and cooperative working environment. Students have independence on what they choose to work on and the teachers are quite supportive. Walden Green has helped me get ready for the future in how to make the best use of my time. It's important to learn this at a young age. I would recommend Walden Green to other kids because it has such a unique feel with a nice mix of students - all with different personalities. I know I've appreciated the individual time to learn. Walden Green has prepared me for my future by helping me become a confident, competent learner. The teachers strive to make sure I know how and why I've reached my answers."
